

Dear Sir/Madam,

I am writing to you as a concerned parent and as someone who appreciates Dr. Matt Loprieato's ideas and efforts to make a daycare available for children with mild illnesses.

I would like to share my own experience, especially this past winter. I am from another country , with no friends or relatives in this area. As you might already know, many many children fell sick and stayed sick for days on end and so did our son. He did not have anything major, a low grade fever (that came and went) and a nasty cold. But we were unable to send him to daycare which meant my husband or I staying home from work. We love our son very much and his health and care are our primary concerns, however, we do need financial stability as well in order to provide for him. We have had to take many unpaid days that was hard for our family.

Our family is very excited about Dr. Loprieato's idea as it would allow parents like us, who have no other support systems in the area to send our child to a safe place when we know that he only has a minor infection.

We really hope that you will support this idea and provide support for families like ours.

Thank you !

Sukriti Kushwaha
